BACK TO THE FUTURE

During the Institute's early days when the ***Explorer Program*** was in full swing, Bob, as well as the explorers themselves, were amazed at the richness and depth of information that was coming through during sessions in the Lab. When it was confirmed to Bob's satisfaction that some explorers were able to allow "others" to speak through them and that these others had a larger overview, a broader perspective on the human condition, Bob eagerly interviewed the channeled entities. Content addressing anticipated "earth changes" was of particular interest.

[Explorer recording #9 Earth Changes](#)

*Four Explorers discuss **Earth changes throughout the world**, the reasons for them and what humans can do to avert or minimize their effects. All foresee coming catastrophe, but many beneficial results in the next 20+ years.*
